

DID YOU KNOW THIS?

Agmax Chlorine....

Agmax Chlorine is a liquid chlorine and contains 270g/lit Sodium Hypochlorite. It can be used as an additive to your alkali wash in both the machine and vat, to prevent protein build up. It is also a fast and effective way to remove slime and algae off concrete.

APPLICATION AND DILUTION RATE

Milk Plant and Vat Washing

Add 500mls of Agmax Chlorine to every 200 litres of alkali wash solution for both plant and vat once a month or when necessary to prevent protein build up.

Concrete Cleaning

Use 1 part Agmax Chlorine to 2 or 3 parts of water. Apply using a trigger sprayer or pressure sprayer and spray onto the affected area to wet.

100 Other Uses too

Clean-up all around your dairy and yards
Gets rid of moss e.g. fence posts
Wash down the house and clean the roof
Use on brickwork and paths

SAFETY PRECAUTIONS

When using this product wear gloves and eye protection plus suitable protective clothing. Ensure adequate ventilation during use. Ensure container is stored separately from food. See product label for full safety and handling instructions.
