

## DID YOU KNOW THIS?

### *Agmax Alkali Sachets....*

To compare Agmax alkali sachets with any other brand of alkali powder, check the use rate. Our use rate is 100g/100lt, while many others are 150g/100lt. Our 25kg bag is equivalent to 37½kg of all other brands. This is not only an important cost saving for you, but also indicates the strength of our product.

#### **Features**

- AgriQuality approved
- 100g /100lt use rate
- Superior cleaning and sanitising performance
- Chlorinated alkali destroys fat and protein deposits that breed bacteria
- Economical - 20kg is equal to 30kg of other brands
- Effective in all water types

#### **Benefits**

- No spills or waste, less OSH issues
- Foolproof, easy to use and no measuring
- Sachets retain 100% chlorine strength until they are opened
- Sachets eliminate any issues with product contamination
- Easy to store
- Long shelf life
- No Drum pumps needed

#### *Available in:*
