

DID YOU KNOW THIS?

DAIRYCARE TONIC

WHAT IS DAIRYCARE?

DairyCare tonic is liquid supplement developed to build immune systems in your dairy herd. It is designed to address udder health issues and is administered via dosatron, trough or drenching.

BUILDING HEALTHY HERDS begins with building healthy natural immune systems – and logical solutions begin with feeding natural food supplements. **DairyCare** Tonic is made in New Zealand and sourced from organic aloe vera and manuka honey to bring you a full-strength food supplement second to none for natural nutritional benefits, purity, quality and value.

CERTIFIED ORGANIC INPUT – BIOGRO #4829 allowing farmers to boost their herd's health and stay organic.

PACKED WITH NUTRIENTS and the essential elements necessary for their absorption. **DairyCare** contains 12 vitamins, 11 minerals, 7 enzymes, 21 amino acids, 12 anthraquinones and 6 saccharides to offer a natural, safe, effective way to boost herd health and improve wellbeing.

FOR MILKING COWS

- Unlike antibiotics, there is **no withholding period** after dosing.
- Safe to use **daily** – even in larger doses as an immune system health booster – with no reported adverse side effects.
- Normalises and maintains udder health.
- Maintains condition in cows during calving for earlier returns to milk production.
- With regular dosing, demonstrates measurable improvements in literage and milk solid statistics.

FOR WEANING CALVES

- Helps to normalise and maintain healthy gastrointestinal function.
- Builds immune systems to help natural resistance to infection, for a better start in life, balanced health and good condition.

GUARANTEED RESULTS

Purchase **DairyCare** Tonic for 12 months and follow the recommended dose. If your certified records show no improvement in udder health after one year, we'll refund your purchase cost in full – a no-risk offer with no downside.

DOSAGE & TREATMENT RATES

- **COWS Maintenance dose: 5ml per cow/per day** for long term udder health and immune systems benefits.
- **High Cell Count Cows:** 100ml per cow/per day for 10 days /OR 300ml per cow three times a week.
- **CALVES – 50ml per calf on Day One.**
- **Calves Maintenance Dose: 5ml per calf/per day in milk until weaned.**

Make sure you have at least one drum of DairyCare Tonic on hand for these situations.

2 Litre concentrate – add 18 litres water = 20 litre “ready to use”.
