

DID YOU KNOW THIS?

Agmax Penetrants....

Focus and Weta are tank-added penetrants to be used in conjunction with Agmax Glyphosate herbicide.

- Improves penetration, coverage and adhesion of spray.
- Use rate is 100mls/100lts of made up spray.
- Reduces the rain risk period to 2 hours

Agmax Weta...

- Is the penetrant for use on flat weeds, grasses (including rye grass) and thistles as well as for pasture renewal and prior to planting crops. Essentially it can be used on all non-woody plants.
- Agmax Weta is cost effective.

Can be used as an additive for Avocado Trees to kill 'phytophthora.
