

## DID YOU KNOW THIS?

### *Agmax Teatsweet....*

A remarkable powdered teatspray that has proven to be an outstanding success!

#### **PERFORMANCE**

Teatsweet was tested independently at DRC Ruakura, along with our iodine and chlorhexidine products.

- Chlorhexidine was satisfactory (a thousand-fold reduction in bacteria numbers).
- Iodine was excellent (a ten thousand-fold reduction).
- Teatsweet produced a truly astonishing reduction in bacteria numbers (a hundred thousand-fold), proving to be the most effective bug killer.

#### **CONVENIENCE**

With a sachet, there is no need for measuring and no wastage.

#### **COST SAVINGS**

Teatsweet with Titivate is cheaper than Iodine (12%) or Chlorhexidine (25%).

#### *Available in:*

*5kg pail – 39 sachets – makes up to 780 Litres*

*12kg pail – 94 sachets – makes up to 1880 Litres*

### *Agmax Teatsweet...*

#### **MIXING INSTRUCTIONS**

1. Use a clean 20lt plastic container.
2. Pour in 10 litres clean water.
3. Add the contents of one Teatsweet sachet *to* the water.  
*(It is very important to mix in this order)*
4. Stir / Shake vigorously for 20 seconds to mix.
5. Add the rest of the water, either 6 or 8 litres (amount will depend on the quantity of emollient added) to achieve the following ratio:  
Normal conditions: 1sachet / 18lts of water / 2lts emollient (total 20lts liquid)  
Severe conditions: 1sachet / 16lts of water / 4lts emollient (total 20lts liquid)
6. Finally add 2 to 4 litres of Titivate, Glycerine or Sorbitol emollient.
7. Stir again to mix well.

**You now have 20 litres of ready to use teatspray.**
