If medical advice is need, have product container or label on hand

Refer First Aid instructions on label

SWALLOWED

If Swallowed: Rinse mouth then give a glass or two of water or milk, DO NOT induce vomiting unless medical assistance is delayed by 15 minutes (take care to avoid patient inhaling stomach contents). If breathing stops, mouth to nose resuscitation. Arrange urgent transport to hospital. Immediately call POISON CENTRE 0800 764 766 (0800 POISON) or a doctor/physician.

EYE

If in Eyes: Wash eye with gently running water for at least thirty minutes, keeping eyelids apart and moving eye. Do not rub your eye. Cover with sterile dressing. Seek medical attention immediately. Immediately call a Poison Centre or doctor/physician.

SKIN

Skin Contact: Quickly remove contaminated clothing. Wash skin with large quantities of water. Seek medical attention. Immediately call a Poison Centre or doctor/physician. Wash contaminated clothing and shoes before reuse.

INHALED

If Inhaled: Remove victim to fresh air and keep at rest in a position comfortable for breathing. Apply resuscitation if victim is not breathing. Do not use direct mouth-to-mouth method if victim ingested or inhaled the substance; use alternative respiratory method or proper respiratory device. Administer oxygen if breathing is difficult.

NOTES TO PHYSICIAN

Treat symptomatically. Can cause corneal burns, delayed pulmonary oedema may result. Ensure that attending medical personnel are aware of the identity and nature of the product(s) involved and take precautions to protect themselves. Treat symptomatically and supportively.

SECTION 5 : FIRE FIGHTING MEASURES**GENERAL MEASURES**

If safe to do so, move undamaged containers from fire area. Cool containers with flooding quantities of water until well after fire is out. Avoid getting water inside containers.

FLAMMABILITY CONDITIONS

Non-combustible. Material does not burn.

EXTINGUISHING MEDIA

Use extinguishing media suitable for the surrounding fire. Use dry chemical, CO₂, foam or water spray - Do NOT use water jets.

FIRE AND EXPLOSION HAZARSS

Containers may explode when heated. Contact with metals may evolve flammable hydrogen gas. Contact with moisture or water may generate sufficient heat to ignite combustible substances; spattering and boiling may occur.

HAZARDOUS PRODUCTS OF COMBUSTION

Fire or heat will produce irritating, toxic, and/or corrosive gases.

SPECIAL FIRE FIGHTING INSTRUCTIONS

Runoff from fire control or dilution water may be toxic and/or corrosive and pollute waterways.

PERSONAL PROTECTIVE EQUIPMENT

Wear self-contained breathing apparatus (SCBA) with a full face-piece, in positive pressure mode. Fully encapsulating, gas-tight suits should be worn for maximum protection. Structural firefighter's uniform is recommended for fire situations ONLY - it is NOT effective for spills.

SECTION 6 : ACCIDENTAL RELEASE MEASURES**General Response Procedure**

Ventilate enclosed spaces before entering. ELIMINATE all ignition sources (no smoking, flares, sparks or flames). Do not touch or walk through spilled material. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Avoid contact with skin and eyes

Clean Up Procedures

Contain and absorb. Avoid contamination of waterways. Small quantities can be neutralized with soda ash provided the area is (can be) well ventilated and washed to drain with large quantities of water.

Electrical conductor - isolate power in case of spills.

Containment

Stop leak if safe to do so - Prevent entry into waterways, drains or confined areas. Dike and clean up all spills immediately.

Decontamination

Small spills or residues can be flushed with plenty of water.

Environmental Precautionary Measures

Drains for storage or work areas should have retention basins for pH adjustments and dilution of spills before discharge or disposal of material.

Evacuation Criteria

Spill or leak area should be isolated immediately. Keep unauthorised personnel away. Keep upwind and to higher ground.

Personal Precautionary Measures

Wear SCBA and chemical splash suit. Fully-encapsulating, gas-tight suits should be worn for maximum protection. Structural firefighter's uniform is NOT effective for spills

SECTION 7 : HANDLING AND STORAGE

Corrosive - Nonflammable

Avoid spilling, skin and eye contact. Wear protective clothing, including elbow length PVC gloves and suitable eye protection.

Use with adequate ventilation - avoid creation and inhalation of aerosols.

After use wash hands before eating, drinking or smoking.

Do not handle broken packages unless wearing appropriate personal protective equipment.

STORAGE CONDITIONS

Do not store with D.G classes 1,5,7, strong acids, food or food containers.

Store in original container, out of direct sunlight, tightly closed, away from foodstuffs and out of reach of children.

SHELF LIFE

Use within 6 months

SECTION 8 : EXPOSURE CONTROLS & PERSONAL PROTECTION**EXPOSURE LIMITS**

EYE/FACE PROTECTION

Use safety glasses (with side shields).

SKIN PROTECTION

Chemical protective gloves should be worn when handling this material. Consistent with general hygienic practice for any material, skin contact should be minimized.
