

# fact file: Sorbitol

## What is Agmax Sorbitol

Agmax Sorbitol is an emollient used for teat conditioning and repair additives. All teatspray programs are improved by the inclusion of emollients because teat condition is an important factor in minimising new mastitis infections.

## Features of Sorbitol

- Low cost alternative to glycerine
- Add to teat sprays for teat repair and conditioning

## Available in the following sizes

- 20 Ltr
- 100 Ltr
- 200 Ltr

### Did you know?

A choice of three emollient products are available from Agmax:

#### Glycerine

A premium alternative to Sorbitol. Add to teatsprays for teat repair and conditioning. Compatible with all teatsprays.

#### Sorbitol

A low-cost alternative to Glycerine. Add to teatsprays for teat repair and conditioning.

#### Titivate

A premium quality emollient for use with all Agmax Teatsprays. Maintains teat condition and helps prevent damage. Contains both glycerine and sorbitol.

**EMOLLIENTS** are teat conditioning and repair additives. All teatspray programs are improved by the inclusion of emollients because teat condition is an important factor in minimising new mastitis infections.

#### How much emollient should I use?

1. At the start of the season, add 2 litres of Titivate, Sorbitol or Glycerine emollient in a 20-litre mix.
2. In severe weather (cold/wet/windy) or when teats are in bad condition you can add as much as 20% emollient (eg 4 litres in a 20-litre container)
3. Once summer arrives and teats are in good condition, you can reduce emollient content.

**AGMAX**  
**SORBITOL**

**FOR USE AS AN EMOLLIENT  
WITH AGMAX TEATSPRAY**

**DIRECTIONS : MIX 1 PART SORBITOL AND 1 PART AGMAX  
TEATSPRAY WITH 8 PARTS WATER  
(SEE AGMAX TEATSPRAY LABEL FOR FULL DIRECTIONS)**
